Don’t just sit there, do something.

Global warming is happening here and now.

• Deadly heat waves will become more common as average summer temperatures increase.
• Deadlier forest fires, putting communities and ecosystems at risk.
• Longer and drier summers mean more severe and intense storms.
• Eating, breathing coastal communities from erosion and coastal flooding.
• Let unchecked, global warming will cause sea levels to rise.

...and the country is feeling the effects.

Global warming is happening here and now.

The world’s most respected scientists agree that global warming is real.

* The world’s most respected scientists agree that global warming is real.

Here’s what you can do to help:

1. Call your Member of Congress at 202.224.3121.
   Tell them to protect our way of life and put global warming on the front burner.

2. Volunteer with Project Hot Seat.
   Go to www.projecthotseat.org/getinvolved to learn more.

3. TELL A FRIEND about Project Hot Seat and encourage them to get involved!

Congress is part of the problem or the solution.

The good news is that it’s not too late!

We’re turning up the heat on Congress, to stop global warming—right now.

Project Hot Seat is a project of:

STOP GLOBAL WARMING

PROJECT HOT SEAT
