## So what's up with all this 1 Sky stuff?

1 Sky is a new coalition that's coming together to tackle global warming—and they are using the national climate mobilizations of November 3rd as a launching pad for a sustained climate campaign. 1 Sky aims to communicate a positive vision and a coherent set of national policies that rise to the scale of the climate challenge.

## But why do we need yet another climate change organization—we already have too many!

We couldn't agree more—that's why we're teaming up with 1 Sky. Their goal is provide one unified, cohesive platform for the vast numbers of groups and individuals involved in the fight against global warming. 1 Sky is working to bring the movement together, and to expand it dramatically by inviting a broad range of key stakeholders outside the environmental groups to the table. The unifying force is a common destination – a vision, a moral proposition, and a scientifically based plan for tackling global warming.

## This all sounds great—but what is 1 Sky actually trying to do?

Glad you asked. 1 Sky has spent a good deal of time creating a core set of policy targets that are engaging and big —as big as the problem. They'll be harnessing the power of the grassroots to pass a bold, equitable national climate policy built on the following three priorities:

**1**

### ***Mobilize America***

Launch a Clean Energy Job Corps as the first wave and create 5 million new jobs in the United States. The Corps will help us conserve 20% of our energy by 2015 with a sweeping national mobilization for climate solutions, healthy communities, and energy independence.

**2**

### ***Secure Our Future***

Cut global warming pollution 30% by 2020. This will establish America as a strong partner in the global campaign for solutions, while getting us on a realistic path to reductions of at least 80% below 1990 levels by 2050, the level that scientists say is necessary. Pass climate policies to trigger a clean energy revolution that revitalizes our economy, enhances our security, protects consumers, and provides new opportunities to realize the American dream.

**3**

### ***Transform Our Energy Priorities***

Reprogram fossil fuel and highway investments for clean energy and transportation choices. Start with a firm moratorium on new coal plants, unless and until they can permanently dispose of their global warming pollution

## Awesome! How can I get involved with 1Sky?

You already are—by participating in Step It Up on November 3rd, you're helping to launch the most exciting new climate initiative in the country. The next step is to go to the new 1 Sky Website at [www.1SkyCampaign.org](http://www.1SkyCampaign.org) to learn more and sign up to be part of this growing grassroots movement.

# One Climate. One Future. One Chance.
